

Test-Fest

By Bereket Woldesilasje

What is Test-Fest?

Test-Fest is situation of intensive manual testing which conduct by a group different stakeholder.

Its main purpose is to guarantee defect-free features before delivering them to production.

Who does participate in Test-Fest?

- ★ Tester
 - ★ Developer
 - ★ Product Manager
 - ★ Designer
 - ★ Clients
-

When does Test-Fest conduct?

- ★ Test-Fest is conducted when there is a big feature release to production.
 - ★ When there is a lot of changes to the application
-

How long does Test-Fest take ?

- ★ Depending **Team size**, **number of Test case**, and **size of project** ,it takes 2 hour up to the whole day.

What need to do before Test-Fest?

- ★ Schedule time for it
 - ★ Preparing test cases
 - ★ Set up test environment
 - ★ Perform sanity test
-

Session of Test-Fest

- ★ All people focus on testing (It is not allowed to do other work)
- ★ QA lead test fest session and support other other team if there is unclear test case
- ★ Everyone take a single test case and test it
- ★ Each feature should be tested with some other person which didn't participate in the development of it

What is the result of Test-Fest session

- ★ The outcome of the Test-Fest is the whole team comes with list of bugs that found during the Test-Fest

Post Test-Fest

- ★ After Test-Fest is done , it is a time of bug fixing.
 - ★ Based on level of the priority, bugs are going to be fixed and ready to test again.
 - ★ If the bug is fixed it will passed unless, it will back to again for fix.
 - ★ These process iterate until the bug is fixed.
-

Conclusion

To conclude that, even if Test-Fest consume much time, it is very important.

Rather than preventing lot of error to the production, Test-Fest also play a vital role for understand the whole feature of the application.

Thank You!!
